

SPRAY NOZZLE AIR BLASTER & SPRAY NOZZLE - BODY TOOL

AppliMax Spray Nozzle Air Blaster and Spray Nozzle-Body Tool

Two unique tools that make spray nozzle and nozzle body servicing and maintenance a lot easier and safer.

1. Spray Nozzle Air Blaster

What - The Spray Nozzle Air Blaster's high pressure air blast helps clear blocked or restricted nozzles.

Why - The air blast quickly clears away material that can restrict or alter nozzle output and affect application rate.

It is also a lot safer and more effective than trying to blow out nozzles using your lungs and lips.

2. Spray Nozzle - Body Tool

What - Lets you easily remove nozzle caps, orifices and other nozzle body components for servicing.

Why - Servicing nozzles and nozzle bodies is important to ensure optimal application, but disassembly and assembly can be difficult, especially wearing gloves.

The Tool is specially designed to be used with gloves and fits most nozzle caps and other nozzle body components.
